### For Immediate Release

### **Florida's Turnpike Enterprise is conducting various field activities for proposed Suncoast Parkway 2 Project in Hernando and Citrus Counties**

Land O'Lakes (June 22, 2007)—Residents of Hernando and Citrus Counties are advised that contractors employed by Florida's Turnpike Enterprise are now conducting various field activities associated with the Suncoast Parkway 2 Project. As part of the data gathering process engineers, surveyors, planners and environmental scientists will perform certain research, inspections and surveys.

The Turnpike Enterprise contracted with Dyer, Riddle, Mills & Precourt, Inc. (DRMP), Bowyer Singleton and Associates (BSA) and Reynolds, Smith and Hills (RS&H) along with their sub-consultants for the purpose of conducting the studies in Hernando and Citrus Counties. Their field work will likely continue for at least one year and during this time members of the teams may need to gain access to public or private properties. Therefore, Florida's Turnpike Enterprise has provided team members with an introductory letter to provide additional information.
